

## § 435.306

## 10 CFR Ch. II (1–1–00 Edition)

UPW\*=the uniform present worth discount factor; selected from the last page of the compliance forms.

Equipment Efficiency=the test seasonal efficiency rating of the heating and cooling equipment only (i.e., not including duct or distribution system losses).

(3) Estimating the discounted energy cost for water heating and refrigerator/freezer energy consumption—

(i) For equipment types covered by the COSTSAFR compliance forms, by multiplying the estimated unit energy cost by 100; or

(ii) For equipment types not covered by COSTSAFR—

$$\text{Discounted Energy Cost} = \frac{\text{Annual Energy Consumption} \times \text{Fuel Cost} \times \text{UPW}^*}{\text{Energy Factor}}$$

Where:

Fuel Cost and UPW\* are as defined in paragraph (c)(2) of this section; Annual Energy Consumption is as calculated in 10 CFR 430.22; and Energy Factor is the measure of energy efficiency as calculated under 10 CFR 430.22

(iii) [Reserved]

(4) Adding together the discounted energy costs calculated under paragraphs (c)(2) and (c)(3) of this section;

(d) If the discounted energy cost of the proposed building design calculated under paragraph (c)(4) of this section is equal to or less than the discounted energy cost of the COSTSAFR prototype building design calculated under paragraph (b) of this section, then the proposed building design is in compliance with the applicable energy consumption goal under this part.

[56 FR 3772, Jan. 31, 1991]

### § 435.306 Selecting a life cycle effective proposed building design.

In selecting between or among proposed building designs which comply with the applicable energy consumption goal under this part, each Federal agency shall select the design which, in comparison to the applicable COSTSAFR prototype, has the highest Net Savings or lowest total life cycle costs calculated in compliance with subpart A of 10 CFR part 436.

[56 FR 3773, Jan. 31, 1991]

## PART 436—FEDERAL ENERGY MANAGEMENT AND PLANNING PROGRAMS

Sec.

436.1 Scope.

436.2 General objectives.

### Subpart A—Methodology and Procedures for Life Cycle Cost Analyses

436.10 Purpose.

436.11 Definitions.

436.12 Life cycle cost methodology.

436.13 Presuming cost-effectiveness results.

436.14 Methodological assumptions.

436.15 Formatting cost data.

436.16 Establishing non-fuel and non-water cost categories.

436.17 Establishing energy or water cost data.

436.18 Measuring cost-effectiveness.

436.19 Life cycle costs.

436.20 Net savings.

436.21 Savings-to-investment ratio.

436.22 Adjusted internal rate of return.

436.23 Estimated simple payback time.

436.24 Uncertainty analysis.

### Subpart B—Methods and Procedures for Energy Savings Performance Contracting

436.30 Purpose and scope.

436.31 Definitions.

436.32 Qualified contractors lists.

436.33 Procedures and methods for contractor selection.

436.34 Multiyear contracts.

436.35 Standard terms and conditions.

436.36 Conditions of payment.

436.37 Annual energy audits.

436.38 Terminating contracts.

Subparts C—E [Reserved]
